

# VAGUE<sup>TM</sup> PEN

## What is Hyaluron Pen?

Hyaluron pen is a simplistic device that generates a pressure strong enough to introduce hyaluronic acid into the skin. What makes Hyaluron Pen so special?

The operating principle of the Hyaluron Pen system involves injecting the product at a pressure high enough for easy penetration of the fluid flow (hyaluronic acid) into the skin. It creates full and beautifully contoured lips, fills fine lines and deep wrinkles and offers a skin revitalizing treatment. The results are similar to the classical method of introducing hyaluronic acid through hypodermic needles. The only difference is that Hyaluron Pen does NOT use hypodermic needles for injection.

The procedure is relatively simple, the hyaluronic acid introduced into the skin or lips being a biological skin moisturizer.

### ➤ EASILY

It is very easy to use hyaluron pen. All you have to do is load the pen and press a button.

### ➤ PAIN FREE

It doesn't hurt at all. Why? Because it is not the same as injectable fillers which are often painful.

### ➤ QUICKLY

Each procedure takes very little time, regardless of whether we are talking about wrinkles, lips or body reshaping.

### ➤ SAFELY

You can use it safely because you do not need a needle and you no longer have to be panicked that something may happen.

## NO NEEDLE, NO PAIN

By the simple fact that VAGUE uses ampoule is already a relief for the clients who will from now on enter your aesthetic salon.
